Project: GIFAS In-ground Units for Elephant Park, Southwark
Client: Lendlease
Contractor: HE Simm/Blu3/Eleciserve
Consultant: Buro Happold/Ritchie + Daffin
Start Date: 02 May 2018
Estimated Completion: 2027

Lendlease are working in partnership with **Southwark Council** to deliver a transformation project in the heart of **Elephant and Castle**, London. Elephant Park is set in a leafy park landscape, offering a unique space to be part of a new green vision for city living.

As part of this development **GIFAS in-ground units** have been installed in Elephant Park to safely give temporary access to electrical power in public areas for events and food festivals. The units were supplied with a **variety of socket combinations** to provide **maximum flexibility**.

For this project, not only were **GIFAS in-ground units** specified but also a **CEL wall mounted distribution board** complete with electrical sockets and protection was installed in the Main Pavilion to give further access to temporary power for food stalls.
