Project: Feeder Pillars & GIFAS Units for Commercial Road Market, Portsmouth
Client: Portsmouth City Council
Contractor: SSE
Consultant: Building Engineering Services Team, Portsmouth CC
Date: 13/11/2020

The following photos show GIFAS in-ground units that have been installed along Commercial Road in Portsmouth to allow market traders to easily access electrical power on market days.

Also shown are the Charles Endirect feeder pillars used to safely supply electrical power to the GIFAS units, public information booths and a water fountain.
